Please note:

This price list is a guide only it gives a representation on the cost of a certain scenario. I currently do not hold any stock of these timbers cut ready to go This is due to the variability of size required for so many different models of guitars alone, everything I cut is custom orders. For that reason I am able to cut and process for many other instruments aswell.This price list is for orders above \$300 for retail orders see applicable price list.
